Heavy Lift Jack Up Vessel INNOVATION

Dear Sir or Madam,

We at Overdick are proud to announce that the Heavy Lift Jack-Up Vessel "Innovation" has successfully completed sea and jacking trials and has been delivered to our clients of HGO Infra Sea Solutions (HOCHTIEF Solutions and GeoSea) by the shipyard Crist in Gdynia.

The HLJV "Innovation" is the most capable Jack-Up Crane unit in the world and it has been designed by Overdick with the support of Wärtsilä Ship Design.

This project confirmed Overdick leading edge in the design of modern, multi purpose Jack-Ups.
